14.4 TIE BREAKER CRITERIA

In the event of two or more candidates obtaining same marks, the merit position shall be determined using following tie breaker criteria in descending order:

- i. Candidate who has more number of correct responses shall be placed at higher merit position.
- ii. Failing which, aggregate percentage score of all MBBS professional examinations shall be taken into consideration. Candidate with better percentage will be given a better merit position.

Candidates have to mention the grand total of their marks obtained in all the MBBS professional examinations (Ist Professional + IIInd Professional + IIIrd Professional part 1 + IIIrd Professional part 2) along with aggregate maximum marks of all the professional exams in the requisite field of the online application form. Only the Pass marks in each specialty are to be added to arrive at the grand total of marks obtained in MBBS.

Foreign Medical Graduates i.e. Indian citizens who have obtained their Primary Medical Qualification outside India are required to mention the marks obtained by them out of 300 in the Screening Test (FMGE) conducted by National Board of Examinations.

Candidates are cautioned to enter the correct and factual marks as the same shall be used for tie breaking. Any wrong entry in the marks shall be viewed very seriously and candidature of such candidate shall be cancelled at bare threshold and he/she will not be allowed to participate in the counseling for admission to PG courses.

- iii. Failing which, date of birth of the candidate will be taken into consideration. Older candidate will be placed at a better merit position.

14.5 PERCENTILE VS PERCENTAGE

A percentile rank tells how well a candidate did in comparison to other candidates, while a percentage rank explains how well a candidate did in the test itself. Percentile never gives the detail of the marks that you have scored instead it just tell you about your merit position among the number of candidates who have appeared in the test with you. For example, a candidate might answer 85 percent of questions correctly and rank in the 99th percentile which means that percentile is not related to the percent of correct answers a student gets on a test.

Percentile ranks are commonly used to clarify the interpretation of marks on standardized tests. For example, a test mark that is greater than or equal to 80% of the marks of candidates taking the test is said to be at the 80th percentile, where 80 is the percentile rank.

Whereas percentage of mark is simply calculated based on the mark obtained out of the maximum mark in the test. For example, a test mark of 75% in a test with a maximum mark of 1000 indicates a mark of 750. The percentage of marks is not affected by the candidate's merit position in comparison to other candidates who took the test.

Note : Possession/Use of Mobile Phones/Electronic Devices is strictly prohibited in the premises of NBE Examination Centres. Candidates Shall be liable for penal action for Possession/Use of Mobile Phones/Electronic Devices
